

Ice-Ready™ Rooftop Unit and Ice-Coil™ Kit Ordering Process

Ice Energy has validated the performance of Ice-Ready™ rooftop units (RTUs) with a select group of brands and capacities. See the *Ice-Ready™ Products Selection Guide* for a current list of compatible units. You may order the Ice-Ready RTU directly through an approved modifier or through your preferred distributor.

Option A Ordering an Ice-Ready™ Rooftop Unit through approved modifiers

1. Order selected RTUs and compatible Ice-Ready option (specified in the *Ice-Ready™ Products Selection Guide*) from one of the modifiers listed below to have Ice-Coil™ component installed.
2. Modifier completes modifications and ships Ice-Ready rooftop unit to the job site.

Option B Ordering an Ice-Ready™ Rooftop Unit through preferred distributors

1. Order selected RTUs through preferred distributor with “Ship to” address of a modifier listed below.
2. Contact preferred modifier to order compatible Ice-Ready™ option.
3. Modifier completes modifications and ships Ice-Ready rooftop unit to the job site.

Ice-Ready™ Option Pricing

Contact modifiers for specific pricing. Anticipated pricing for the Ice-Ready option is \$1,200 to \$1,500 (including installation) depending on the unit size and configuration.

Specifying an Ice-Coil™ Kit for installation into an existing rooftop unit

1. Check RTU model number and specifications for compatibility with Ice-Coil Kit. (refer to *Ice-Ready™ Products Selection Guide*)
2. Perform internal inspection of RTU to ensure compatibility with kit installation. (refer to *Ice-Coil™ Kit Field Application Checklist*)
3. Order specified Ice-Coil Kit from Ice Energy.
